

PROPHETS

Online Radicalisation Research

PROPHETS (Preventing Radicalisation Online through the Proliferation of Harmonised Toolkits) aims to tackle the causes of online radicalisation, cybercrime and cyberterrorism and strives to develop new methods to analyse, investigate and fight these emerging threats by addressing the very factors causing them. PROPHETS is working to develop and create real-world impact by realising each of the following 7 objectives:

**Understanding
Online Material**

**Recognising Ethical,
Moral and Legal Concerns**

**Identifying Underlying
Psychological Traits**

**Policy Shaping, Training
and Public Engagement**

**Exploring Cybercrime as
a Service**

**Online Awareness, Capacity
and Resilience Building**

**Tools to Enhance Capabilities and
Counter Radical Behaviours**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 786894.

PROPHETS

PROPHETS project is coordinated by BayHföD, a police university located near Munich. The consortium is made up of 15 partners from 10 EU-countries with different profiles and expertise in several domains, including law enforcement agencies, academia and research and technological organisations.

We analyse, assess and fight online terrorism
